**CO-REC BOUDARY LINE MOVES TO ADVANTAGE WOMEN**

The 175' outfield boundary line will be moved to 200'. With the use of high performance bats and the smaller softball the women have indicated that the perceived advantage has turned to a disadvantage as their new batting prowess has their line drives now reaching the 175' line instead of landing before the boundary line.

The 200' distance should give the distaff side of co-rec nation an advantage plus.

This topic was discussed at the spring focus group.
